

Be the best you can be, every day

Medicines Policy

Introduction

THIS DOCUMENT IS a statement of the aims, principles and strategies for administering medicines at North Downs Primary School.

IT WAS DEVELOPED through a process of consultation with teaching and non-teaching staff and the governing body.

IT HAS BEEN TAKEN FOR APPROVAL to the Governors in Spring 2018

THIS POLICY WILL BE REVIEWED in Spring 2020.

Section 100 of the Children and Families Act 2014 places a duty on governing bodies of maintained schools, proprietors of academies and management committees of PRUs to make arrangements for supporting pupils at their school with medical conditions. The governing body of North Downs Primary School will ensure that these arrangements fulfil their statutory duties and follow guidance outlined in 'Supporting Pupils with Medical Conditions' January 2016.

Staff do not have a statutory duty to give medicines or medical treatment. However, medicines will be administered to enable the inclusion of pupils with long-term medical needs, promote regular attendance and minimise the impact on a pupil's ability to learn. In an emergency, all teachers and other staff in charge of children have a common law duty of care to act for the health and safety of a child in their care - this might mean giving medicines or medical care.

Prescription Medicines

Medicine should only be brought to school when it is essential to administer it during the school day. In the clear majority of cases, doses of medicines can be arranged around the school day. Pupils prescribed a short-term course of antibiotics/ointment to be taken/used 3 times a day, should have this administered outside school hours e.g. with breakfast, on getting home from school and then at bedtime. Occasionally pupils may be prescribed a short-term course of antibiotics/ointment to be taken/used 4 times a day. In this instance, they may have it administered by a parent or their representative in school or a member of school staff, subject to written notice being given to the school office.

The procedures for administering medicines in school will be as follows:

- Medicines should be brought to school by the parents/carer and handed to a member of the office staff.
- Medicine must be provided in the **original container** as dispensed by the pharmacist, clearly labelled and include any equipment required to administer the medicine e.g. spoon, oral syringe.
- Parents/carers will be required to complete a consent form (appendix Template A) before the school can administer the medicine. A new form will need to be completed if there are

changes to the existing medicine or a new medicine needs to be given. The forms will be filed in the office.

- It is the responsibility of the parent/carer to ensure that the medicine does not exceed its expiry date.
- When medication is administered at school a written record will be completed and filed in the office (appendix Template B).

Asthma

Pupils requiring an inhaler/reliever for the treatment of asthma are referred to the specific 'Children with Asthma' form (appendix Template C).

- All inhalers should be clearly labelled with the child's name.
- Children with asthma must have easy/ready access to their medication and so inhalers will be stored in the classroom or school office.
- It is the responsibility of the parent/carer to ensure that the medication is within its 'use by' date and is replaced when necessary.
- If the child leaves the school premises, on a trip or visit, the adult in charge will ensure the child has their inhaler with them.

Storage of medicines

Medicines should be locked away in a lockable cabinet or non-portable container, with the key being readily available to the appropriate members of staff to ensure access in case of emergency. The exceptions to this may be:

- Medicines for use in emergency situations such as asthma, anaphylaxis, diabetes and epilepsy, when immediate access would be essential. These will be stored in a clearly identified container.
- Medicines needing refrigeration. These are kept in the staffroom, clearly labelled in an airtight container.

Management of medical conditions

Where a child has known medical needs the parent/carer should provide the Headteacher with sufficient information about their child's medical condition and treatment or special care needed at school. Arrangements will then be made between the parents, headteacher, school nurse, first aiders and other relevant health professionals to ensure that the pupil's medical needs are managed well during their time in school. The school will then prepare an individual healthcare plan in consultation with parents and relevant medical experts. (See appendix Template D) This plan will be reviewed by the school annually or following a significant change in a pupil's medical condition. For certain long-term medical conditions, it is important for children to learn how to self-administer their medication, but this will always be supervised by a member of staff. Appropriate arrangements for medication should be agreed and documented in the pupil's IHCP and parents should complete the relevant section of 'Parental request for school administration of medicine' (Appendix Template A).

Medicines on Educational Visits

Staff will administer prescription medicines to pupils when required during educational visits. Parents should ensure they complete a consent form and supply sufficient supply of medication in its pharmacist's container. Pupils with long-term medical needs shall be included in educational visits as far as this is reasonably practicable. School staff will discuss any issues with parents and/or health professionals in suitable time so that extra measures (if appropriate) can be put in place for the visit. All staff will be briefed about any emergency procedures needed regarding pupils where needs are known and copies of care plans will be taken by the responsible person.

Staff Training

The school will ensure that all staff who administer all medicines including those for diabetes, epilepsy and anaphylaxis are trained and that this training is regularly updated. Training in the administration of medications is arranged via the school nurse. A record of training must be maintained to show the date of training for each member of staff and when repeat or refresher training is required. See 'Staff Training Record' (Appendix Template E).

Parental request for school administration of medicine

- please complete all areas

Name of child Date of birth.....

Class

Medical condition or illness.....

Please tick the appropriate box

My child will be responsible for the self-administration of medicines as directed below.

With supervision Without supervision

I agree to members of staff administering medicines/providing treatment to my child as directed below.

Name of Medicine	Dose	Frequency/times	Completion date of course (if known)	Expiry date of medicine
Special instructions				
Allergies				
Other prescribed medication child is taking at home				

Staffing (details of staff agreeing to the administration of this medication)

Name (1).....

Name (2).....

Parent Contact Details (must be available for contact at all times)

Name.....

Contact No/s.....

- I agree to update information about my child's medical needs held by the setting and that this information will be verified by GP and/or medical Consultant.
- I will ensure that the medicine held by the setting has not exceeded its expiry date.

NOTE: Where possible the need for medicines to be administered at the school should be avoided. Parents/Carers are therefore requested to try to arrange the timing of doses accordingly.

TEMPLATE C

Dear Parents

Children with Asthma

If your child is asthmatic would you please complete and return the following questionnaire.

Thank you.

Child's name _____ Class _____

My child's asthma is triggered by _____

A preventer is used at home and contains _____
(please enter the prescription medicine)

A reliever is used at school and contains _____
(please enter the prescription medicine)

Relievers should ideally be kept on the person, as per the Surrey County Council guidelines, or, in the case of very young children, easily accessible in the classroom. It is helpful if a spare reliever is kept in the classroom or in the school office.

The reliever is kept by my child/in the classroom and will be taken out at sports/school trips*

A spare reliever is kept in the classroom/school office*

*delete where appropriate

Infants: I am aware that whilst my child should be able to use his/her reliever unaided, his/her use will be supervised by a member of staff.

All medication must be clearly marked with child's name and class.

Signed: _____ parent/carer Date: _____
