

Reminder

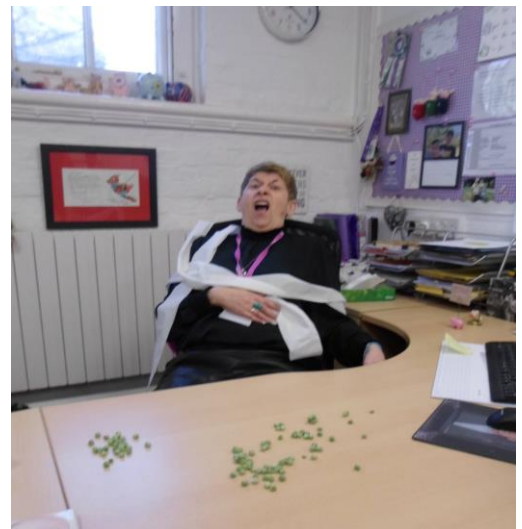

The deadline for paying for the Discovery Centre trip was yesterday. Please check the parentmail sent out on 16th January for further details.

Over the last two weeks, we have been:

- Looking at different types of houses and building models of them.
- Using different resources to help us with our subtraction of numbers to 20.
- Using our imagination to bring to life the story of Supertato and the Evil pea.
- Having lots of fun describing the terrible crimes Evil Pea has been committing - see the photo of Mrs Douglass.
- Making our own Supertato to help save the day!
- Investigating the properties of different materials in science.
- Looking at the different styles and techniques used by Lowry and Hunterwasser to create cityscapes.

Over the next two weeks we will be:

- Learning place value with numbers to 50. Talking about tens and ones.
- Designing and making a smoothie for the Evil Pea as part of DT.
- Continuing to look at the adventures of Supertato and writing our own story.
- Learning about real life 'superheroes' in History as part of our topic on explorers.

Help!

If you have any superhero stories at home that you would be happy to share with your class please bring them in and give them to your class teacher.

As we are now nearly half way through the year we would like to make sure that anything the children bring in for show and tell is clearly linked to our learning. Thank you for your help with this.
