

Year 3 Week 1 – 20.04.20

This sheet can be printed or you could draw some shapes into your home learning book and shade them in.

How many ways can you shade in these shapes to create $\frac{1}{2}$?

Shade these diagrams in different ways to show:

$\frac{1}{2}$, $\frac{1}{3}$, $\frac{1}{6}$ and $\frac{1}{9}$

Now try $\frac{2}{3}$, $\frac{2}{6}$ $\frac{4}{9}$ and $\frac{7}{9}$

Challenge question:

Which is the largest fraction $\frac{2}{6}$ or $\frac{4}{9}$ explain your reasoning?

Which is a smaller fraction, $\frac{2}{3}$ or $\frac{7}{9}$?
