

WALT describe what we know about the different parts of plants and to ask questions about plants for further investigation

WILF

- I can identify the parts of a plant.
- I can describe some of the functions of those parts.
- I can ask scientific questions about plants.

- *What do all the plants have in common?*
- *What differences are there between them?*
- *What do the plants need in order to grow and stay healthy?*
- *Let us look at these questions in turn. Can you work out the answers?*

- *What differences are there between them?*

The plants have different shaped leaves, different shaped flowers, different coloured flowers and some plants grow from a bulb.

- *What do all the plants have in common?*

All of the plants have leaves and have flowers at different times of the year.

- *What do the plants need in order to grow and stay healthy?*

Plants require water, light, warm temperatures, air and time.
