

# Classification & Variation

## Worksheet 7: The Fish Family

**Wow Fact**

There are more than  
31,500 species of fish

Animals can be grouped into different families, like the fish or mammal family. But in each family there is a huge variety of animals that come in all shapes and sizes!

- ★ Look at the pictures of four different fish below.
- ★ Circle all the things that are the same on the fish.
- ★ Underneath each image, describe the things which makes each fish different.
