

GARDEN DESIGN

At Hampton Court Palace, most of the gardens are very formal, are designed into patterns or are symmetrical whilst others are less formal and known as wilderness gardens.

Some garden designs incorporate statues, sculptures or water features whilst others are more practical and are planted with herbs and vegetables.

YOUR TASK

- Use your garden design planner sheet to create a design for your very own garden. Decide what kind of garden you are creating.
- Is it symmetrical or patterned?
- Have you decided to create a wild garden?
- Are you using plants, flowers, herbs, vegetables?
- Will you add water features, statues, special lighting?
- Make up a key with symbols to represent the elements in your garden.
- When your design plan is completed, make a 3d model of your garden. Use recycled materials, natural objects or even real plants!
