Fantastic Firefighters

What Do Firefighters Do?

Firefighters are people who have a very important job to do – they are part of the emergency services. Their job includes many different tasks, such as putting out fires, rescuing people who might be trapped in either a fire or an accident, teaching people about fire safety and helping to clean up chemical spills and floods. They sometimes also rescue animals!

A firefighter's job can be dangerous and it is essential that they work well together as part of a team. The job requires that they are fit and strong. They also need to be kind and good at putting people at ease when they are in stressful situations.

What Do Firefighters Wear?

When firefighters are called out to tackle a blaze, they wear a long jacket and thick trousers. These are insulated to protect them from extremely hot temperatures. Firefighters wear large protective rubber boots and thick gloves. They wear a helmet with a visor to shield their face. The firefighter's uniform has reflective strips on it so that they are visible in dark and smoky conditions.

Firefighters carry a torch so they can see in the dark. They communicate with other firefighters by using a radio. Firefighters also have to wear oxygen masks and carry oxygen cylinders to help them breathe when working in smoke.

What's on a Fire Engine?

Fire engines need to carry lots of equipment to help the firefighters to carry out their job.

Breathing apparatus

Firefighters need to wear this when dealing with smoke or chemical fumes.

They wear oxygen cylinders on their back. These are connected by a tube to a face mask which is strapped to the firefighter's head.

Hoses

There are 2 different types of hoses.

Hose reels

These are connected to the fire engine and are black or yellow. They are used for smaller fires.

Hose jets

These are larger hoses which are very powerful. Two firefighters are needed to control hose jets.

They are used to put out bigger fires.

Sirens and blue flashing lights

These are used to get people's attention so they know that the fire engine is travelling to an emergency.

Tools

Lots of different tools are stored on the fire engine. Some are used to help rescue people in road traffic accidents.

Ladders

There are 4 different sizes of ladders stored on a fire engine.

These are all different lengths. The longest ladder is 13.5 metres long!

Equipment

This includes inflatable boats and dry suits for going in water, as well as first aid equipment and animal rescue tools.
