

In maths we are learning how to interpret data in different charts and graphs. We are finding out about labelling axes and how to read and plot the data correctly.

MATHS

Soon we will be generating our own data before producing a graph that suits the data representation with the most accuracy.

HOME LEARNING

As we move to the end of the school year, our homework is slightly changing; it is time for Year 4 to leave TEAMS, for now. Homework will follow the expected daily reading, which should be carried out at home. Class teachers will set Post reading tasks within school time, so the pressure is off parents - just make sure there is a little time for the pleasure of reading.

RSHE

We have taught the children about menstruation and having a baby. They were very mature and the sessions were very informative. Thanks for your support with these sensitive subjects.

MTC

A big thank you to all of your hard work - both children and parents for fantastic efforts learning times tables. The MTC test was completed on Thursday and will be a great stepping stone as the children move in to Year 5.

Next week's words will be:

Scheme; chorus; chemist; echo; character.

We will be focussing on re-visiting common exception words Y1-Y4 up until the end of the school year.
