

Science Week

Next week is Science week and all year groups will be dedicating most of each day to Scientific activities. Year 3 will be enjoying a birds of prey session (including a flying demonstration if the weather is good), an exciting STEM session and a 'Silly Science afternoon'. In addition to these activities we will be looking at the theme of flight as a year group, with reading comprehensions about famous aviators, exploring gravity, recreating modern artworks about aviation, creating Powerpoint presentations about birds or famous aviators and carrying out a helicopter investigation. And we'll continue to practise our dance for the Maypole event as well!

We are really excited to be spending a whole week immersed in Science after a gap of a couple of years; maybe we will inspire a future scientist, engineer or mathematician of the future!

Outdoor Learning

Year 3 continue to enjoy their outdoor learning session this term. We have been focussing on fraction and have been making fraction walls, finding equivalent fractions and dividing natural materials into equal groups.

We are Learning...

Maths - We are continuing our work on fractions

English - We will be using Science week as our stimulus next week

History - We will continue learning about Ancient Britain

French - We continue to learn the names of fruits

R.E. What it means to be part of a community

PE - Athletics & Swimming

Computing - We are learning about networked systems

Science - We are continuing our 'How does your garden grow' unit of work.

DT - We are finishing our unit on moving monsters
