

What's happening in Year 3

The days are getting cooler and shorter as we work our way through November. Year 3 are working really hard and this has been especially clear in Maths, where they have really persevered with column addition and subtraction, and with English, where their writing is becoming more detailed, organised and fun to read. We will soon be gearing up towards Christmas so expect some singing of Christmas songs to start and the excitement to build (NOT starting just yet, we promise!)

We are learning about:

English - We have started our work on adventure stories using James and The Giant Peach as a stimulus.

History - We are continuing our work On the Ancient Egyptians

French - 'I am learning French'

Art - We will be exploring how to Create different effects using charcoal

Maths - We are starting a seven week unit on Multiplication and Division

RE - Different beliefs about how it all began

PE - Netball

Computing - finishing e-safety and then learning about PowerPoint presentations

Science - Light and dark

Spelling Rules

Week beginning 21st November - Doubling consonants for suffixes

Week beginning 28th November - Split diagraphs for long vowel sounds

Keeping Warm

Now that it is (starting to get) cooler please do send your child in each day with a warm coat; the wind whips across the playground and it can get really cold out there. As we always tell the children, it's better to have the coat and not use it than to need it and not have one!

Homework

This week we have set another spelling homework.
