

Now that we are almost half way through this final half term, Year 3 are continuing to enjoy their learning in all subjects. We have been working hard on learning to tell the time to the nearest minute, using the 24 clock and working out durations of time.

PSHE

In the next few weeks in PSHE we will be teaching Year 3 about the changes that will occur in their bodies over the coming years, including those which enable people reproduction. This teaching is very factually delivered and builds on the work started in Year 2.

Year 3 Camp Night

We are all looking forward to next Friday's camp night. We are currently working out how many tents we have been 'offered' and will be in contact very soon to confirm this with anyone who can lend us a tent. Next week we will be working on planning a journey from Betchworth to Brockham, looking at how to create a healthy packed dinner and asking the children who they would like to be in a tent with.

Stone Age Day

On Tuesday, Year 3 enjoyed a fantastic day with 'Flint', learning more about Ancient Britain than we thought possible in one day! The children now know how to hunt a mammoth if they come across one, how to make stone tools and just how difficult it would have been to build Stonehenge.

We are Learning...

Maths - We are finishing our work on time

English - We will be starting our work on adventure quest stories

History - We will be finishing our unit on Ancient Britain

PE - Athletics & Swimming

Computing - We are continuing our work on computer networks.

Science - Animals, including humans.

French - We continue to learn the names of fruits and vegetables. We will also be learning about ancient Britain, but in French!
